

AGRI-INJECT®

Because irrigation can deliver more than just water.®

▶ Insectigator®

A pivotal strategy for timely management of crop threats

Fast, precise response to pests and disease

- ▶ Precise application of low volumes of insecticides and fungicides
- ▶ Respond to threats immediately without waiting for custom application
- ▶ More cost effective than aerial or ground application
- ▶ Low cost alternative to larger systems
- ▶ Portable, lightweight unit for easy transport between fields

30 gallon (113.56 L)

20 gallon (75.71 L)

10 gallon (37.85 L)

Insectigator®

A pivotal strategy in managing crop threats

When pests or disease threaten your crop, you can't afford to wait.

But you can afford an Insectigator®. Insectigator from Agri-Inject® puts immediate and affordable response in your hands when pests or disease attack your crop. Insectigator comes in three sizes—and each one provides extremely accurate and precise application of low volumes of crop protection products through your irrigation system. You don't have to wait or pay for aerial or custom spraying.

- ▶ Accurate to ± 1% after calibration
- ▶ Three power options: 12 volt, Single phase, Three phase and can accommodate most international electrical configurations
- ▶ Mixer option available on all sizes
- ▶ Comes complete with discharge hose and Mister Mist'r® injection check valve

Common sense design features include:

- ▶ Portable, with convenient stainless steel handles for easy lifting and transport
- ▶ Engineered to be compatible with corrosive chemicals
- ▶ Variety of capacities and options to precisely match your application
- ▶ Separate control switches for pump and mixer

Accurate, adjustable pump

- ▶ FIG pump is fully adjustable from 1.9 gallons/hour down to 0.07 gallons/hour (7.19 liters/hr down to 0.26 liters/hr)
- ▶ Teflon diaphragm separates internal components from corrosive materials
- ▶ Diaphragm flexes gently to move chemical with pinpoint accuracy

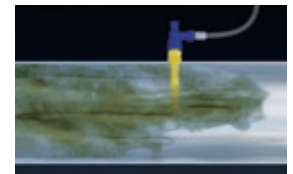

Adjust flow rate on the go

- ▶ Flow rates are set on an easy-to-read control panel
- ▶ System can easily be adjusted while operating

Patented injection technology assures complete mixing

- ▶ Mister Mist'r® atomizes crop protection products into the irrigation stream
- ▶ Ensures complete and accurate application across the field
- ▶ Serves as check valve to prevent backflow into system and water supply

*Mister Mist'r® U.S. Patent No. RE37,732

Eliminate the guesswork of pump selection and pump rate calibration.
